

# COURSES

We teach our courses privat or semi privat on IKO (international kiteboarding organization) standards. All our spots have shallow water areas with knee deep crystal clear water, a lot of space and steady wind conditions.

These are absolutely the best conditions to learn kitesurfing or to improve your level.

Normally we teach 3-4 Lessons a day, depending on the wind conditions and the student. If the wind forecast shows a good wind for the whole day we split the lessons and teach in the morning and after the lunch break.

Semi privat courses can only be booked, if there are two students with the same level.

Our courses includes the complete equipment the spot access and material insurance.
